

# ThorneVet Canine Basic Nutrients

Multi-vitamin / mineral complex for all phases of a dog's life

# Canine Basic Nutrients offers a complete formula of essential and highly absorbable vitamins and minerals.

## Meeting canine needs

Canine Basic Nutrients is recommended for all phases of a dog's life. It provides a broad range of nutrients, in a palatable form, to meet canine needs. With the deficiencies of modern processed food and the escalating pollution of our food, water, and environment, it is difficult to know whether dogs are getting all the basic nutrients needed for optimal health. By providing dogs with a comprehensive multi-vi-tamin/mineral formula early in life, or before they become ill, you can enhance the quality and length of their lives.

The macrominerals (calcium and magnesium) are provided as well absorbed and highly concentrated malate chelates. The trace minerals (zinc, copper, iron, and chromium) are supplied as the highly bioavailable glycinate chelates. Vitamins B2, B6, B12, and folate are provided in their active, tissue-ready forms (riboflavin 5'-phosphate, pyridoxyl 5'-phosphate, methylcobalamin, and 5-methyltetrahydrofolate, respectively).

## **Key Nutritional Support Features**

Optimizes canine health and vitality

Enhances quality of life

#### Additional supplement support

Although Canine Basic Nutrients is a suitable nutritional support formula for dogs of all ages, you also might want to consider Canine Geriatric Basics for additional nutrient and botanical support for dogs that are older than six. Canine Basic Nutrients can be combined with other ThorneVet products that provide support for specific health concerns:

Joint Support Formula (Formerly Arthroplex®) Provides muscle and joint support

Helps cats and dogs maintain healthy joint mobility. It also relieves soreness and stiffness and supports healthy cartilage. V944-P / 120 Scoops V944-SC / 120 Soft Chews

#### Gut Health Formula (Formerly Gastriplex®) Enhances gastrointestinal health

Supports the health of the whole GI tract in dogs and cats who suffer from poor digestion from food intolerance, indiscreet eating, poor quality pet foods, antibiotics, and stress.

A unique liver-protective formula for dogs and cats featuring

CurcuVET. Offers comprehensive liver support. It enhances

glutathione levels, supports liver cells, and aids detoxification.

V946-P / 180 Scoops V946-SC / 180 Soft Chews

Liver Support Formula

Provides hepatic support

(Formerly Hepagen<sup>®</sup>)

V961-P / 90 Scoops

V961-SC / 90 Soft Chews

#### Heart Health Formula (Formerly Bio-Cardio) Promotes cardiovascular health

Combines the antioxidant potential of CoQ10 with other cardio-protective nutrients and botanicals. Because Heart Health Formula promotes oxygen utilization it enhances the animal's physical stamina.

V940-P / 90 Scoops V940-SC / 90 Soft Chews

# CurcuVET-SA50 / SA150

Helps maintain a healthy inflammatory response

CurcuVET-SA50 is curcumin formulated to help maintain the normal inflammatory response in the GI tract, liver, and musculoskeletal system of smaller dogs. CurcuVET-SA150 soft chews is for larger dogs. CurcuVET-SA150 powder is for both dogs and cats.

V939-P / 90 Scoops V939-SC / 90 Soft Chews V938-SC / 90 Soft Chews

CurcuVET® is a registered trademark of Indena S.p.A.

(ij)

Immune Support Formula (Formerly Immugen®) Supports a healthy immune system

Comprehensive immune support formula that contains nutrients, botanicals, and glandulars. It activates natural killer cells, thereby enhancing an animal's innate resistance to pathogens. V943-P/90 Scoops

V943-SC / 90 Soft Chews

# Canine Basic Nutrients
